

In this Art-Peace called "The Passover" we will be discovering some things of Astronomical proportions. Let's get right to it. The scientific notation for the speed of light is exactly 2.99 times 10 to the 8th power which will give you the speed of light in meters per second.

There are two Hebrew words in the center of this Art-Peace. The word on top means "to cry out" or "crying out". This word has a numerical value of 265. This is why you will see the number 265 written vertically to the right. Below this word is another word written in Hebrew. This word when translated means "The Passover" & its numerical value is 153. This is why you will see the number 153 written vertically to the right there as well.

If you divide the word for "crying out" at 265 over "The Passover" at 153 you get 1.732... & some more floating points, which is denoted as the letter A in this Art-Peace. Then, below this there is "A squared" which = 2.99. Then multiply that times 10 to the 8th power & you get the Speed of Light. Yes, you can calculate the Speed of Light with this Art-Peace called "The Passover". However, let us dig a bit deeper into "The Passover" itself. "The Passover", is in fact, the first Full Moon in the first Month on the Hebrew Calendar.

Now, we want to prove that the Hebrew AlphaBet as well as the Holy Torah, or Hebrew Bible is of Divine Origin. "The Passover", occurring at the first Full Moon of the first month literally determines how many Full Moons there are in a year. Let us explain. Every 3 years there is a 13th Moon within 12 months which means that there isn't always 12 Full Moons per year. This is the concept of the leap year. However, astronomically speaking since there is either 12 or 13 Full Moons in the year, according to science, the exact mathematical average amount of Full Moons there are in a year between 12 and 13 & is exactly 12.369...

Now, let us see why, "The Passover" Moon is of Divine Origin literally determining the average amount of Full Moons there are in a year. "The Passover" again has a numerical value of 153. You will notice if you square root 153, or you square root "The Passover" the first Full Moon of the first month of the religious calendar of the Hebrews you will get the exact scientific, mathematical average amount of Full Moons there are in a year which is 12.369...

This is truly Astronomical. This is Math, this is Science, this is Creation, this is Torah. This is enough to prove that the Hebrew Bible is of Divine Origin & that there is in fact One Divine Creator of Heaven & Earth. This is Proof of Intelligent Design!

May we Bless Adonai the King, May we Fear His Holy Name & Remember the Torah of His servant Moses. The Hebrew Alphabet is the Genetic Fabric of the Universe, the Holy Torah is the Mirrored Reflection of Pure Divine Will (G-D) in the Cosmos, & May the Eternal Light of the Holy Torah fall like Rain upon the Earth. May this Art-Peace shed the Light & the Truth of the Holy Torah's Sublime Wisdom upon all those who See it & Hear the Words therein, & May this Art spark Holy conversations that are pleasing to our KING, the Holy One Blessed be He forever & ever Hallelu'Yah amen!

Additional information comes with Art.
